Separator GREEN BEDDING

FAN Separator GREEN BEDDING

www.fan-separator.de

A BAUER Group company

**New Press Screw Separator to produce bedding material,
dry matter content up to 36% in solids.**

Benefits

- Dry matter content up to 36% in solids when separating cattle slurry
- Production of cheap, harmless bedding by using the slurry existing on the farm. No additional bedding has to be bought.
- High dry matter content even at high throughput rates
- Low energy consumption
- Press screw and screen basket made of stainless steel
- Long life of the auger due to hard metal coating
- Housing made of cast iron
- Permanent cleaning of the screen by the auger
- Easy to maintain

Economical production of bedding material!
